Press Release

Lux-Right Areawalls feature improved Hug-tight™ flattened flange

Minneapolis, MN -- May 1st, 2003 -- St Paul Corrugating Company announces that all die and roll formed Areawalls now feature an integrated flattened flange providing for more secure wall attachment. Now both buck-mount and wall-mount Areawalls benefit from an enhanced manufacturing process that also increases structural rigidity in addition to improving installation. All products now shipping feature this improvement. St Paul Corrugating Company continues to make product improvement without changing pricing. Quantity based discounts continue as follows:

St Paul Corrugating Company established in 1885 and makers of "The Original Areawall" will continue to develop and offer new products to enhance below ground living space. Please contact your sales representative or call our factory at 800-439-9271 for more information.
